The Sixth Annual Aquatic Management Winter Workshop

Friday, February 12, 2010

Purdue University, West Lafayette, IN

Please join us at the Purdue University Beck Agricultural Center for our Sixth Annual Aquatic Management Winter Workshop.

This year our workshop will focus on new products and techniques, application systems and future changes in regulations. Over the past year many of you may have already heard of the NPDES permitting process. This is a mandatory nationwide system that will require more documentation and possible permit fees. We are also being joined by Valent Corporation, UPI and Applied Biochemists for product and technology updates.

Since our State Chemist has increased the amount of CCH's to 15, attendance at this workshop is even more critical to keeping your license current. Registrants will receive Category 5 CCH Credits or CCH Credits for registered technicians attending this workshop. Our State Chemist awards 1 CCH for each hour of presentation related to our field and I have submitted over four hours.

This is a free event but has limited seating, so please RSVP today.

Best Regards,

Ed Spanopoulos
