

Cygnet BioBlend II

Water Soluble Pack (WSP)

BIOLOGICAL WATER QUALITY ENHANCER

- Reduces Ammonia
- Reduces Nitrite & Nitrate
- Reduces Phosphate
- Reduces Bottom-Sludge
- Reduces Odors
- Reduces Murky Water

BioBlend II WSP (water soluble packets) is a formulation of beneficial pond bacteria, for use in ponds, lakes, lagoons, fish & shrimp hatcheries and similar aqua-environments. It naturally removes excess ammonia-causing and nitrite-causing wastes from the water, while simultaneously removing problem-causing nitrates and phosphates. It also naturally removes decaying organic wastes such as grass clippings, leaves, excess fertilizer runoff, dead plants and animal wastes. Plus, it eliminates murky water, odors and bottom sludge, caused by organic waste buildup. BioBlend II WSP is packaged into pre-measured, one-half pound water-soluble packets to simplify dosing. Simply apply around the edges of the pond, as long as water temperatures are above 55° F. Wait 48 hours after the use of a pesticide before applying product.

Initial Dose: 8 Pounds (16 Packets) per Surface Acre of Water
Maintenance: 4 Pounds (8 Packets) per Surface Acre of Water

**NET
CONTENTS:**

10 POUND

390914A | (Contains 20 one-half pound
06539468 | Water-Soluble packets)

25 POUND

390915A | (Contains 50 one-half pound
06539469 | Water-Soluble packets)
